RE: TV logs

To ML Auer <execdir@frpc.net>

Hello Monica

At the moment this is the best we have.

TV Logs as you can see are massive and we are looking into an alternate method of automating the process.

Subject: TV logs

Hi,

I'm trying to use the TV logs now posted here: <https://open.canada.ca/data/en/dataset/800106c1-0b08-401e-8be2-ac45d62e662e>

The datasets are very large (several hundred MB), and because they are not zipped, take a very long time to download. Because they include three months' of logs for all stations, they are also difficult to manipulate.

1. Is it still possible to access the logs one at a time?
2. If the logs can only be accessed by quarter, can you provide zipped versions?
3. Are all the data set out in the same fixed format (so that they may be read by software such as SPSS?) If so, could you provide the format structure.

Thanks,

Monica L. Auer, M.A., LL.B, LL.M.
